

19th International Chromatography School

19th ICS will take place at Faculty of Chemical Engineering and Technology, Zagreb, **10–11 June 2019**.

Thousands of scientists and engineers have worked on the development of chromatography over the last several decades. The result is one of the most versatile techniques that we have in chemical science today. The development is still going on with thousands of papers and many books being published every year.

International Chromatography School has been providing an ideal forum in the last fifteen years for chromatographers from different regions of Balkan peninsula and neighboring countries. The practice of chromatography is sufficiently widespread such that discussions on diversity of applications, qualitative and quantitative data as well as quality assurance data acquisition become extremely important that they are considered worthy of inclusion in peer reviewed literature. We find above arguments compelling enough to organize ICS once again. ICS is **free of charge**.
